Summary

Aspiring Computer Science student with strong hands-on experience in AWS Cloud, DevOps, and front-end development, focused on building secure, scalable, and real-world applications. Skilled in Python, Java, and cloud tools like AWS, Jenkins, and Terraform, with proven teamwork through project-driven development and deployment.

Hands-on Experience

- **Cloud & DevOps:** AWS, Google, Docker, Terraform
- **Languages:** Python, Java, C++, C, SQL, HTML/CSS
- **Familiar:** Kubernetes, Jenkins, Ansible, Selenium
- **Systems:** Linux (RHCSA), Networking
- **Tools:** Git, GitHub, Postman

Internship Experience

AWS Cloud Intern - Technical Hub Pvt. Ltd.

May 2025 – June 2025

- Architected and deployed a secure 2-tier client-server environment on AWS, utilizing EC2 instances behind an NGINX reverse proxy for optimized traffic routing.
- Engineered custom VPC topologies featuring isolated public/private subnets, custom route tables, and strict security groups to protect backend resources.
- Implemented principle-of-least-privilege security by configuring granular IAM roles and policies for safe, frictionless server-to-server communication.
- Streamlined compute infrastructure by provisioning, configuring, and maintaining EC2 instances within strictly structured network environments.

Technical Projects

DeployZEN

Team Project

- Built DeployZen, a cloud-based platform that simplifies static site hosting by integrating AWS services (S3, Lambda, DynamoDB, Cognito, EC2) with Flask and Tailwind.
- Implemented GitHub/ZIP uploads, automated deployments, and secure authentication, reducing manual deployment.
- Integrated an Amazon Lex chatbot to enhance user experience and seamlessly handled 500+ concurrent user requests.
- **Website/Code:** [GitHub Repository](#)

ShadowTrace Travel AI

Team Project

- Developed a smart safety and emergency monitoring mobile application that provides real-time travel tracking, live location sharing, automated delay detection, and emergency alert notifications to trusted contacts using cloud-based communication services.
- Integrated voice-command-based emergency activation and remote monitoring features, enabling users to trigger alerts hands-free during unsafe situations while supporting real-time monitoring for faster emergency response.

Academic Background

Aditya College Of Engineering And Technology, Surampalem

2023 – 2027

B.Tech in Computer Science and Engineering

- **CGPA:** 8.4

Tirumala Educational Institutes, Rajahmundry

2020 – 2022

MPC - Intermediate Education

- **GPA:** 9.57

Coding Profiles

- **LeetCode** – 100+ problems solved [\[Profile Link\]](#)
- **GeeksForGeeks** – [\[Profile Link\]](#)
- **CodeChef** – 1-star coder [\[Profile Link\]](#)
- **HackerRank** – 5-star SQL; 3-star Python, C, C++, Problem Solving [\[Profile Link\]](#)

Certifications

- **HTML & CSS Certification** – Web Foundations Series (Certiport) [\[Certificate Link\]](#)
- **Cisco NetAcad** – Programming Essentials in C, C++, and Python [\[Certificate Link\]](#)
- **Oracle** – Java Foundations Certified Associate [\[Certificate Link\]](#)
- **Red Hat** – Red Hat Certified System Administrator (RHCSA) [\[Certificate Link\]](#)
- **AWS** – AWS Certified Developer - Associate [\[Certificate Link\]](#)
